

WINSIG 4-23-11

Household Register 2011 is a free home inventory software program for the PC helps you organize, manage and catalog a detailed list of everything you own. It's ideal for both home and office inventories.

Household Register 2011 automatically organizes each inventory entry by category, location, and owner. You can customize the category, location, and owner look-up lists to fit your inventory needs.

This program tracks item, location, owner, category, serial number, model number, description, purchase and replace prices, warranty information, extended warranty information, appraisal information, and a 32,000-character memo field.

Exports/import your home inventory data to html, excel, ascii, and dbase. Prints reports to screen, printer, PDF, HTML, XML and text.

The program will also aid in determining the amount of insurance required for your home owner or renters insurance policy. The program can be used to assist in estate planning, by assigning possessions to heirs through the use of the owners field.

OkCustomMap:

OkCustomMap is a software to produce Garmin Custom Maps. Supports many map formats, JPEG quality, KML transparency, draw order, image scaling and filters. You can customize the size of the tiles or the tiles number horizontally or vertically.

OkCustomMap is a software to produce Garmin Custom Maps.

Supports many map formats:

- OkMap
- Ecw
- GeoTiff
- World files
- OziExplorer
- GpsTuner

You can customize:

- The quality of the output JPEG images (0=Bad, 100=Good)
- The KML transparency (0=Transparent, 255=Opaque)
- The KML draw order (0=Invisible, 1-49=Under the vectorial data, 50-100=On the top)
- The image filter to be used in resizing functions
- The percentage of resizing of the images to generate
- The size (width and height) of the tiles you want generate or customize the tiles number horizontally or vertically

- The tiles you want to generate (using the right mouse button also)

The button Optimize automatically sets the best settings to generate the "Garmin Custom Maps".

The output file format is kmz (Google Earth) compatible with Garmin Custom Maps.

SPAMfighter Standard:

Spam/phishing filter for Outlook/Express and Thunderbird. Join 6 million SPAMfighters with a clean inbox. Languages: English, German, French, Spanish, Danish, Chinese, Japanese, Russian, Swedish, Norwegian, Dutch, Italian, Greek, Czech, Thai.

SPAMfighter has teamed up with Microsoft to make an easy to use, stand alone, anti-spam and anti-phishing tool for Outlook, Outlook Express, Windows Mail or Thunderbird. SPAMfighter is easy to install and use.

With SPAMfighter Pro, you save time and frustration trying to sort through spam. You are also protected against the dangers of spam and phishing mails, such as harmful attachments, and identity theft. Download SPAMfighter and protect your computer and personal information in minutes.

SPAMfighter works in a unique way by harnessing the power of a very large community of people who instantly report any spam or phishing message they receive. Once several people have reported the same email, it is automatically filtered for the rest of the community. Install SPAMfighter and you will stop receiving spam instantly. If by chance you do receive a spam message, you will get the satisfaction of reporting it and removing it for all other community members with a single click.

Join the millions of SPAMfighters across the globe with a clean inbox. SPAMfighter is a Microsoft Gold Certified Partner and is currently available in 19 languages: English, German, French, Spanish, Portuguese, Chinese, Japanese, Russian, Swedish, Norwegian, Dutch, Italian, Greek, Suomi, Bulgarian, Czech, Thai and Danish.

SPAMfighter is Microsoft Gold Certified Partner
