- It is easy to use and absolutely FREE!

TweakNow WinSecret 2009 v1.4.1

<http://www.tweaknow.com/WinSecret.html>

As a long time Windows user you might have heard about registry. The registry is a special file in your hard disk that hold most of Windows settings data. Wish to improve your internet speed or display message at Windows logon? No problem, those tasks can easily be done by simply editing the registry value. Unfortunately registry is not a friendly place for most people. Changing a wrong value in the registry may cause an unpredictable problem to your Windows. This is why novice users should not edit registry value directly using a registry editor by them self.

TweakNow WinSecret includes the most popular Windows XP/Vista registry settings and provides them for you in an easy and safe user interface.

All settings are divided in the following sections:

- Applications
- Control Panel
- Desktop
- Miscellaneous
- Network & Internet
- OEM Info
- Special Folders
- Start Menu
- User Accounts
- Windows Core
- Windows Explorer

Free for non-commercial use.

What's New in version 1.4.1:

- Added three new registry tweaks:
 - Windows Secret->Windows Explorer->Context Menu: Add Option to Open Directory Using Administrator Command Prompt
 - Windows Secret->Windows Explorer->Miscellaneous: Change Window Border Padding Size
 - Windows Secret->Windows Core->Security: Disable USB Drive Write Support
- General: added Splash Screen
- General: fixed minor user interface glitches
- General: fixed problem with shortcut keys
- General: other minor improvements and bug fixes

UnderCoverXP 1.22

<http://www.undercoverxp.tk/>

UndercoverXP is a small program to easily print CD and DVD covers. It supports JPEG, GIF, PNG and BMP formats and can automatically scale front covers, back covers, front + inside, inlays, DVD Boxes, Digital [Pictures](#) and CD/DVD labels to the correct sizes. Other formats can be easily added via a graphical format editor.

UnderCoverXP is written in C++ using [Microsoft](#) Visual Studio 2008 and doesn't need a .NET framework or any other external libraries. And best of all... it's free!

UnderCoverXP is available in 25 languages: English, Dutch, German, French, Spanish, Italian, Swedish, Finnish, Norwegian, Danish, Portugese, Polish, Macedonian, Russian, Greek, Turkish, Romanian, Hungarian, Brazilian, Chzech, Latvian, Chinese, Japanese, Catalan and Arabic translations are included in the setup.

What's New in version 1.22:

- Translations: Translations of the formats are now also used in the Format Editor.
- User Interface: Displaying of the preview for trays got broken for several skins.
- Translations: Text below the preview indication no image loaded was not always translated correctly.
- Skins: Added an option to draw an edge around the preview paper (for skins with light backgrounds of the main window).
- Translations: Added Vietnamese translation.
- Translations: Updated the Italian and Hungarian translations.
- Format Editor: Manual changed values of positions were not saved.
- Startup: Check for updates now uses the undercoverxp.tk redirector instead of the direct link.

XP and Vista Free newsletters.

As promised, here are the URL's I got from Judy Hile but didn't have available today at the meeting. I changed them to get you to the Home page. The ones Judy provided to you to the Subscribe page. You can subscribe from the Home page. I figured you'd like to see some of the content before signing up for the FREE newsletter(s).
