

March 2009 WINSIG files.

The first one is for Vista only. The rest all work on XP and Vista.

Ultimate Windows Tweaker has over 130 tweaks. These have been categorized under seven headings and can be accessed through a common interface, just like your Windows Vista Control Panel.

SliderDock is an application launcher that will allow you to easily drag and drop icons to access them later by double clicking on them. It's a unique dock where you don't have to chase behind your icons to run an application. Just rotate your mouse wheel and let the icons come to you.

Features:

- * Simple drag and drop function to add an icon
- * quickly launch an application
- * use the mouse wheel to let the icons come to you
- * smooth animations during icons rotation
- * Highlight effect around selected icon
- * customizable icons(compatible with objectdock and rocketdock icons)

* Hide/Unhide application with the use of a shortcut key

Comodo VerificationEngine Modern Web browsers normally do a terrific job of security, but freebie Comodo VerificationEngine takes it several steps further. Designed as an anti-phishing add-on for many browsers, VerificationEngine uses basic color codes (green for go, red for stop) to give you the goods on sites you visit. There's no other notification from the application besides color, so colorblind users may have issues with VerificationEngine, however.
